Features Key:

Permanent death, a hero's high level, and continues support
Greatly increased difficulty for solo play and greater freedom in battle
A re-playable story full of humanity

The Main Battle System

This is the flagship spell distribution system among fantasy action RPG games. Due to the recognition of the character's history and the emphasis on story, the delicate balance of Battle System, HP and MP, Omen in the Magic Circle, and PVP Damage is kept.

1) Specified as a battle system combining strategic play, time management, and a combative sense. Both the strategy and the action for enemies grow, and offers more variety than traditional action RPGs. 2) An unusual feature of 'PERMANENT DEATH' where if a character is defeated, that's it! The character you have prepared your character for is lost forever. (i.e., there's no refuges and saving point to return to and load the character page data. Do you want to use it or not?) 3) A number of stages a character's battle to see is gradually increased over time. So you can set many characters' skills, and use variations like attacks' ranges and varying effects on the use of skills, for a greater variety of play.

4) A new element of magic, Omen in the Magic Circle, interacts with a decisive effect in battle, and each area has a different rule.

5) PVP, powerful battles occur in dungeons where there's a level 30 dungeon boss. The player who wins 5 times wins!

The G-Rank Combat

Orthodox fantasy action RPG battle. Although orthodox, this battle system is more strategic, where you can manipulate the skill set for each character with joy.

1) Powerful destruction around the user's avatar. (juggles placement) Various characters are given a status debuff status by multiple explosions, surrounding damage, and explosion. Depending on the unique status and area, there's a difference in the damage of impacts. (For example, Steel damage, Light damage, and Dark damage.) If a status debuff occurs, increase the amount of damage dealt. 2) Attack Combo Attack can have synergy
