HARDWARE CODES.Q: What is the most performant and powerful method to store data in table in MongoDB? I'm creating an app in node.js which stores user's created drawings and comments. I store each comment as following : drawingId, comment,timestamp,userId. So I have about 200,000,000 records. I need to query each and every record and that is really slow. A receptacle for optical connections is known in which a ferrule defines an internal cavity in a cylindrical alignment sleeve, and the ferrule defines an external cavity adjacent the alignment sleeve. At least one optical fiber is received in the external cavity, with its end face adjacent the end face of the alignment sleeve. In this manner, the end face of the optical fiber is located inside the alignment sleeve relative to the end face of the ferrule, and the alignment sleeve is fixedly connected to the ferrule. The ferrules and the alignment sleeves are intended to be mechanically fixed and hermetically sealed together.Activation of human dendritic cells by herpes simplex virus: a molecular mechanism at the crossroads of immune response and autoimmunity.
