Updated text size, improved color picker, and responsive curves. The color picker in Adobe Photoshop has been a major issue for me at times, and this update to the menubar makes it a lot more pleasant to use. In the new Etch artist tools, you can press your finger or stylus to the length of the tool barto adjust the position of the tool. The position is updated instantly and you can even cancel if you move your finger away and want to resize it. Undo has been speeded up. You can now undo five layers at once, the same number as before. Garbage collection for nondisplaced brushes has been streamlined, so they stay where you left them. Delete commands and undoes are now unified into one function. Adobe's technical change log in the help explains that the undo history has been reduced, and that two layers may remain on screen at one time—true!
